Specialty Diver Courses

Deep Diver \$395 – 2 days & 1 evening

The deep diver course is designed to take Advanced divers past their 30m training depth safely, all the way to the recreational limit of 40m. You will learn about specialized deep diving equipment and techniques and practice these over 4 training dives. Upon completion you will be certified to dive to the recreational limit of 40m. Includes 2 double boat dives, manual, tuition and certification.

Enriched Air (Nitrox) Diver \$295 – 1 day & 1 evening

Enriched air nitrox extends your no-decompression limits by reducing the amount of nitrogen you breathe. This means you can stay at a given depth for longer, while statistically the safety improvement by using nitrox is very small, many divers report feeling better after diving especially after multiple dives. This course is also an important stepping stone for those interested in technical diving. Includes crew pack, double boat dive (if not combined), tuition, certification and 2 nitrox fills.

Digital Underwater Photography \$295 – 1 day

This program is designed to enhance your skills in underwater photography and teach you the basics of capturing great images underwater. You will learn the fundamentals of good photography then apply that knowledge during 2 training dives. You will also learn the basics of photo editing and how to handle your digital files. Includes Manual, white balance slate, double boat dive, camera use (if required), tuition and certification.

Night Diver \$295 – 1 day

The night diver course is designed to give you the skills to safely complete night dives independently. You will learn underwater signals, equipment requirements, techniques and planning. You will do 3 night Dives to complete your training. Includes Manual, 3 shore night dives, tuition and certification.

Peak Performance Buoyancy \$120 (\$250 for boat dive option) – 1 day

This program is designed for new divers, those who have not dived in a while and those who struggle with buoyancy control. You will take an in depth look at what affects your buoyancy, how to set up your equipment to make buoyancy control easy and over 2 dives you will practice trim and finning techniques that will make your diving easier and more enjoyable. Includes 2 dives (Shore or boat), tuition and certification.

Emergency Oxygen Provider \$160 – 1day

Oxygen is what keeps us alive, being able to provide 100% oxygen to an injured person dramatically improves their chances of survival and recovery. This course is designed to teach you how to setup and effectively use emergency oxygen. You will practice assembly of an actual O2 unit, learn about the different delivery systems, and practice oxygen administration. Includes manual, tuition and certification.

Drift Diver \$295 – 1 day

Strong currents can either be the undoing of a great dive or the making of one! Traditionally currents attract lots of fish life, as this is what we want to see we need to be able to handle diving in current, sometimes we don't plan to get caught in a current, and in certain dive sites the plan is to simply flow with the current and get picked up at a different spot. Whatever the case, being able to handle diving in current is what the drift diver course trains you to do. You will learn about preparation, equipment and techniques used in drift dives and practice these techniques on 2 actual drift dives. Includes Double boat dive, manual, tuition and certification.

Search & Recovery \$350 – 2 days

Whether it be lost treasure or lost sunglasses, being able to efficiently locate and recover objects underwater is a valuable skill. During this course you will learn advanced search techniques, planning, rigging and lifting of small to medium sized objects. Over 4 dives, 2 shore and 2 boat you will practice locating and recovering different objects from varying depths and terrains. Includes double shore dive, double boat dive, manual, tuition and certification.

Underwater Naturalist \$295 – 1 day

Just watching marine life can be very enjoyable, but that enjoyment can be enhanced, by understanding the interactions that are taking place and being able to identify the animals involved. The underwater naturalist course is designed to give you an insight into underwater relationships, ecosystems and the basics of species identification. Includes double boat dive, manual, tuition and certification.

Wreck Diver \$295 – 1 day

Whether sunk on purpose as an artificial reef or the result of mishap, wrecks open fascinating windows to the past. Most divers find wrecked ships, airplanes and even automobiles nearly irresistible because they're intriguing to explore, exciting avenues of discovery, and usually teeming with aquatic life. The PADI Wreck Diver course teaches you the ins and outs of rewarding, responsible wreck diving. Includes double boat dive, manual, tuition and certification.

Navigator Diver \$295 – 1 day

Every scuba dive is more enjoyable when you know where you're going, where you've been and where you are at any given time underwater. The confidence that comes with this knowledge saves time, reduces stress and makes your scuba diving experience more efficient and fun. While many scuba diving sites offer clear water and plenty of visual aids to navigation, scuba divers can learn to use a few tools and techniques to easily find their way even when visibility is poor and the environment is featureless. . Includes double boat dive, manual, tuition and certification.

Multilevel Diver \$295 – 1 day

If you're doing it right, scuba diving is usually anything but strenuous, and experienced divers know that maintaining neutral buoyancy is the key to easy diving. Not only that, once your buoyancy control is good, learning other skills like [underwater photography](#), [fish identification](#) and [underwater navigation](#) is a whole lot easier! The underwater environment will thank you as well, since good buoyancy control keeps you from crashing into the coral reef and other natural habitats you encounter.
